

# ADVANCING ECO-AGRICULTURE

Connecting the Missing Links for Full Potential Agriculture

## Fall:

In fall preceding the anticipated crop obtain a complete soil analysis.

Apply mineral correctives, inoculants and microbial stimulants as recommended and incorporate prior to seeding a cover crop.

## Spring Preplant:

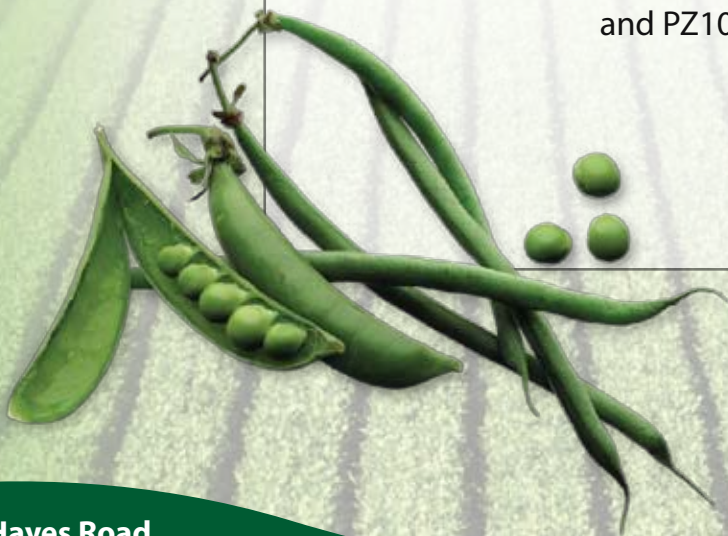

Broadcast recommended crop fertilizer following cover crop incorporation and prior to planting as needed based on soil analysis and crop requirements.

## Enhanced Nutritional Program

### Beans and Peas

*All application rates are per acre*
