

ADVANCING ECO-AGRICULTURE

Connecting the Missing Links for Full Potential Agriculture

Fall:

In fall preceding the anticipated crop obtain a complete soil analysis.

Apply mineral correctives, inoculants and microbial stimulants as recommended and incorporate prior to seeding a cover crop.

Spring Preplant:

Broadcast recommended crop fertilizer following cover crop incorporation and prior to planting as needed based on soil analysis and crop requirements.

Enhanced Nutritional Program

Cucurbit Crops

All application rates are per acre

Seed Treatment	Biogenesis III SDG	1 oz. /100# of seed
