

GRAZIER'S ESSENTIALS™

PASTURE, PRAIRIE & RANGE LICKS™ (PPR LICKS™)

For All Grazing Livestock

- PPR LICKS™ are formulated to augment the fluctuating nutrient uptake of grazing livestock.

Forage quality is inconsistent and is affected by forage varieties, plant biodiversity, maturity and digestibility. Weather extremes, soil fertility and grazing management also influence forage quality. Implement a cost effective fortification program and allow your animals to naturally select the formulation that best addresses their nutritional requirements.

PPR LICKS™ contain:

- | | | |
|---------------------|----------------------------------|----------------------|
| • Macro Minerals | • Trace Elements | • Enzymes |
| • Stable Probiotics | • Vitamins (fat & water soluble) | • Activated Charcoal |
| • Dyna-Min™ Clay | • Kelp | |

Four complete Free Choice Pre-Mixes with different Calcium & Phosphorus Ratios

Recommendations: Having at least 2 licks available to livestock at all times - the 2:1 PPR Lick™ and the 1:2 PPR Lick™ (Also provide loose free choice salt)

Better Yet: Add the 1.5:1 PPR Lick™ and the 1:1 PPR Lick™ and allow the animals to be even more selective. (Also provide loose free choice salt)

Pregnant Animals: Need to have the 1:2 PPR Lick™ and the 1:1 PPR Lick™ accessible. (Also provide loose free choice salt)

If you can only use one: The most appropriate choice would be either the 1.5:1 PPR Lick™ (predominantly grass pastures) or the 1:1 PPR Lick™ (predominantly legume pastures).

If mixing into full ration: Please consult with your Agri-Dynamics distributor for the proper ratios.

Packaging: 50lb (22.7 kg) bags

Warning: For animal use only. Keep out of reach of children.
