## Grazier's Essentials™ Buckaroo™ Trail Blazer

**Buckaroo™ Trail Blazer** consists of what readily can be called the **extra rare elements** that are the nutritional missing links to equine nutrition. As an adjunct to a complete fortified feed, **Buckaroo™ Trail Blazer** provides a plethora of major, secondary and minor elements found in naturally occurring prehistoric seabed deposits, which are also rich in humic and fulvic acids, as well as plant tannins and phenolic compounds.

**Buckaroo™ Trail Blazer** also includes a minor amount of our flagship product called **Hemocel 100™**, a micro-package containing chelated trace minerals (proteinates), USP vitamins, herbs and kelp.

**Buckaroo™ Trail Blazer** can be provided as a “stand alone” supplement for horses on nutrient-dense forages and feeds; or it can be the “extra factors” needed when feeds or other premixes do not provide enough of the nutrients necessary to maintain optimal health and performance.

## Equi-Sentials™ Total Premix for Horses

**Equi-Sentials™** is a premiere premix consisting of a comprehensive and complementary formula that provides the **macro** (major) elements of calcium, phosphorus, magnesium, sulfur as well as **minor** elements of zinc, copper, manganese, iron, cobalt, selenium and those ultra-trace elements found in **kelp** and naturally occurring **prehistoric ocean deposits** such as boron, chromium, iodine, vanadium and dozens more!

**Equi-Sentials™** utilizes **whole amino acid complexes or peptides** to chelate the trace elements as “pro-teinates” thus enhancing their bioavailability. Generous amounts of U.S.P. **fat soluble vitamins** (A,D&E) and **water soluble vitamins** (B-Complex) are an integral part of this formula. These vitamins are co-factors of minerals and contribute to a vigorous immune system.

**“Species-specific”** equine microbials are incorporated as the source of “probiotics” and specific **botanicals** which make up an array of liver hepatics, digestive bitters are the phytoceutical synergists to help this formula’s ingredients work in concert.

**Kelp** is provided for its suite of amino acids, carbohydrates, vitamins and trace elements. **Equi-Sentials™** provides your horse with a master formula of those essential factors that cost effectively address the needs of every horse: stallion, mare, gelding, foal; and for every purpose: working, driving, racing, pleasure, performance, growth, reproduction, pregnancy and lactation. It is truly the standard bearer of nutritional excellence that will demonstrate results in short order: bloom, vigor, rate-of-gain, stamina, fertility, endurance, immunity, hoof quality and digestion.

## Limber Res-Q™

This recipe is formulated to address the needs of horses challenged with injuries, over-exertion and age related joint deterioration. The **Limber Res-Q™** blend consists of nutraceuticals and phytoceuticals that are **anti-inflammatory, analgesic, nutritive and reconstructive**.

The ingredients consist of selected amino acids, minerals, enzymes, botanicals and “cartilage precursors” that assist in nourishing **afflicted joints**, soothe painful **tender tissue** and assist in healing irritated or damaged cartilage, tendons and ligaments. Collectively, these ingredients work synergistically in helping horses heal and provide an internal “partner” that can enhance the effectiveness of topical anti-inflammatories or compresses, acupuncture, chiropractic and massage.

Supplementing **Limber Res-Q™** along with a **comprehensive** fortification consisting of **Equi-Sentials™ Total Premix** and **Buckaroo™ Trail Blazer** will provide the extra requirements of working, performance and convalescing horses, particularly when feed or forage quality is less than optimum or in the challenging circumstances of acute/chronic injuries and accentuated exertion.

### Instructions for use

General Directions for Adult Horses  
(please see labels for complete directions)

#### **Buckaroo™ Trail Blazer:**

Top dress feed with 1 oz per day

#### **Equi-Sentials™ Total Premix:**

Top dress feed with 2 oz per day

#### **Limber Res-Q™:**

Top dress feed with 1-2 oz, once or twice a day, as needed.
